VOLUNTARY ANNOUNCEMENT

The Board is pleased to announce that the World Intellectual Properties Organization (“WIPO”) recently has formally disclosed three of the Company’s patents under application for public examination. The disclosure establishes a priority of the patents to be granted by the WIPO and therefore a critical step toward receiving patent approval.

The patents disclosed are related to innovative systems and methods for content and data packet delivery through a hybrid network of broadcasting and telecommunication, which will likely revolutionize the way mobile data is transmitted today and vastly expands network capability for delivering massive amount of mobile video and multimedia data, which currently is causing severe network traffic congestion and frustrating consumer experience.

Currently the Company is a first-mover in adopting the technology in its New York mobile network deployment.

Further information about the Company’s patent filing can be accessed with following links:

US2013029310 EFFICIENT BROADCASTING VIA RANDOM LINEAR PACKET COMBINING
